

PREDATOR CX 300HP

***Deluxe 12-Gallon, Dual-Pressure, Hot-Water
Tank Extractor***

For extraordinary restorative hot-water carpet cleaning, the **Predator CX 300HP** is the perfect machine.

The CX 300HP is the deluxe 12-gallon model of the Predator line. It combines adjustable pressure (75 psi for upholstery, drapes and stubborn areas - 300 psi for sensational deep-nap cleaning) with incredible suction for the ultimate in cleaning power. Hot, high-pressure solution is literally blasted into the carpet, and then immediately extracted for a deep cleaning that's 50% more effective than cold water extraction. The CX 300HP comes equipped with a Smart Circuit Locator, which indicates when an additional electric circuit is needed to power the Instant Heat Exchanger. This heating element keeps consistent 212°F water on hand for the entire job. A special By-pass Switch is also included for times when no additional circuit can be located.

A tip-back feature on the CX 300HP allows easy access to the powerful vacuum motor; industrial 3-stage, positive-displacement pump; Instant Heat Exchanger and all inner workings of the machine.
