

PREDATOR CXH 100 & CXC 100

8-Gallon Compact Tank Extractors

For big cleaning performance in a compact design there is the 8-gallon **CXH 100** (Hot) and **CXC 100** (Cold) Predator tank extractors from NSS.

The NSS Predator series of tank extractors are high-pressure machines with amazing carpet cleaning abilities. In the heated **CXH 100** model, hot, high-pressure solution is literally blasted deep into the carpet nap, and then immediately extracted for the ultimate in restorative carpet cleaning. The Predator CXH 100 comes equipped with Smart Circuit Locators (no more blown breakers), Solid-State Circuitry (trouble-free operation) and an Instant Heat Exchanger (consistent 212°F solution temperature). This model features a 100 PSI pump in a compact, easy-to-transport body.

Dual vacuum motors produce 150 inches of waterlift with the help of a vacuum manifold, which equalizes motor performance and assures consistent, smooth operation.

The **CXC 100** is the non-heated version of this machine.
